Ivan Nikolskiy

Carlow, Ireland

enty8080@gmail.com / +353 083 894 7134 github.com/enty8080 linkedin.com/in/ivan-nikolskiy

PROFILE

- 3rd-year Computer Security student, **experienced in penetration testing software development and penetration testing**.
- **6+ year experience** on GitHub and **5.000+** stars on personal projects.
- CTF player, **won biggest Irish ZeroDays CTF twice** in 2024 and 2025.
- **PATCH 2025 Alumni,** developed social network for students – Cohort.

KEY SKILLS

- **Programming Languages**: C, Python, x86/x64 Assembly, Objective-C, JavaScript (React).
- **Security Skills**: Web Application Security (RCE, XXE, SSTI, SQLi, XSS, CSRF), Reverse Engineering, iOS in-depth Security, Cryptography, 4 years of experience in CTFs, OIDC/Oauth2 stack.
- **Penetration Testing**: Kali Linux, MetaSploit, NMAP, XAMPP, WireShark, Python, IDA Pro, pwntools, BurpSuite, nmap, Volatility Framework.
- **Server Infrastructure**: Docker, Kubernetes (k3s), WireGuard, Postfix/Dovecot, AWS (EC2, ALB, SES, ECS, ECR, RDS, IAM).

PROJECTS

Cohort **Student Discovery Platform** **Ongoing**

- Mobile application for students to find friends on campus based on shared experience and interests.
- Developed using Capacitor/React for frontend and Django for backend.
- **Technologies**: Python (Django), JavaScript (React/Capacitor).

HatSploit Framework **Modular Penetration Testing Platform** **Ongoing / 300+ Stars**

- Independently developing an extensive CLI for automation and simplification of penetration testing.
- Utilizing C & Assembly for providing a wide range of payloads that can be used within the framework.
- **Technologies**: Python, C, Assembly, Penetration Testing.

SeaShell Framework **iOS Remote Access / Post-Exploitation** **Ongoing / 600+ Stars**

- Independent vulnerability research, use of CoreTrust bug in iOS 14/15/16 for exploitation.
- Development of C implant for remotely controlling device and accessing Photos/SMS/VoiceMail and other user data.
- **Technologies**: Python, C, Objective-C, iOS in-depth security.

Ghost Framework **Android Remote Access / Post-Exploitation** **May 2022 / 3.1k+ Stars**

- Independently developed extensive CLI for automating Android post-exploitation by abusing ADB service.
- **Technologies**: Python, Android Debug Bridge.

Pwny Implant **Advanced Remote Access Implant** **Ongoing / 80+ Stars**

- Independently developed extensive C implant for automating data exfiltration, complete system access, persistence and other RedTeam tasks.

- Large project written in pure C and designed for portability and extensibility, user-friendly CLI and API written in Python.
- Implemented various communication methods between control server and implant including RSA encrypted TCP and HTTP tunnels.
- **Technologies**: C, Python, RSA Cryptography, x86/64 Assembly.

More projects available on my GitHub

EDUCATION

South East Technological University (SETU) Carlow, Ireland
Bachelor of Science (Honors) in Cyber Crime & IT Security September 2023 – Present

- **Expected graduation**: May 2027
- **Year 1 GPA**: 88% | **Year 2 GPA**: 80%
- Member of the SETUSU Executive Class Representative Council (1+ years).

Moscow School of Programming Moscow, Russian Federation
Software Development / Networking / Cyber Security September 2019 – May 2023

- Gained hands-on experience in cyber security and penetration testing though various CTF competitions.
- Enhanced skills in team collaboration, project development, and problem-solving.
- Learned networking & switching basics as well as basics of boolean algebra.

WORK EXPERIENCE

EntySec (entysec.com) Russian Federation - Ireland
(Self-Employed, Non-Profit) *Founder, Software Developer & Security Researcher* July 2020 – Present

- Developed several (13) open-source projects intended for providing cybersecurity solutions, penetration testing tools and toolkits for RedTeams, exploits and payloads. Posted them on EntySec's GitHub.
- Released some products like HatSploit Framework, SeaShell Framework and Ghost Framework, well known in Android security community.

ACHIEVEMENTS, ACTIVITIES AND INTERESTS

- **PATCH 2025** (2025) Participated in Patch accelerator in Dublin, developed Cohort, an app for students to discover friends on campus based on shared interests and experience.
- **ZeroDays CTF** (2024, 2025) Participated in the competition with CTF team Loki in 2024 and 2025 and we won 1st place twice in a row.
- **PHDays 11 / Offzone 2022 Conferences** (2022) Presented my own security software and solutions including HatSploit Framework to describe new methods of penetration testing.
- **MIREA Cyberbethlon CTF** (2021, 2022) Participated in the competition with my CTF team ShadowLegacy in 2021 and 2022 and we won 1st place twice.
